- *Cosmonauts: How Russia Won the Space Race* (BBC). Having trouble finding anywhere online to view or purchase this documentary (2015?)
- Patrick Moore live commentary on the original Moon landings
The Sky at Night - Apollo 11: A Night to Remember, Acorn Media UK, running time: approx. 133 minutes. Abstract: 'This special Sky at Night film, introduced by Sir Patrick Moore ... celebrates what has been described as the greatest adventure of all time. Through the painstaking re-assembly of historic videotape, clips and sound archive, together with original NASA footage of the mission, A Night To Remember relives the momentous epoch in which man first went to the moon.'

Note: sub-committee discussed but rejected a suggestion that the Club invest in a library of DVD's for loan to members, due to probability that discs would have a short life
